OPERATIONS AND PROCESSES

Quality Control

To ensure quality in the business processes, products, machinery, equipment and systems, the business has put in place all necessary quality control and certification to ensure compliance with all specified requirements. The business strives to provide excellent service to every customer through the continuous development of a quality management system. The plant manager and the plant supervisors have been tasked with ensuring the Application of National Building Regulations and Compliance with the provisions of SANS 10400 and other applicable national standards to enable compliance with the requirements of the National Building Regulations.

Management is responsible for:

- The implementation of an effective documented quality control system, in order to gain control over all activities in each factory that can affect service and product quality.
- Promotion of awareness amongst all staff that the achievement of quality depends on the contribution of each individual.
- Satisfaction of customer requirements, improving productivity, reduction of non-conformance and increasing profit by:
 - Improving turn-around time.
 - Improving Employee development.

Enviromental Awareness and Safety

The business places great importance on the environment protection, health and safety of its staff. The business strives to comply with legislation as prescribed by the Occupational Health and Safety Act (Act 83 of 1993 as amended) and the National Road Traffic Act (Act 93 of 1996 as amended).

The Plant Supervisors act as Safety Officials, they perform standby activities on a rotating cycle to ensure that a Safety Official is always available to assist with Safety needs on any of the business activities. The business is also committed to adhering to all other factory safety regulations as prescribed by the machinery suppliers and by regulations. Staff working at the factories is issued with all necessary personal protective equipment and clothing.

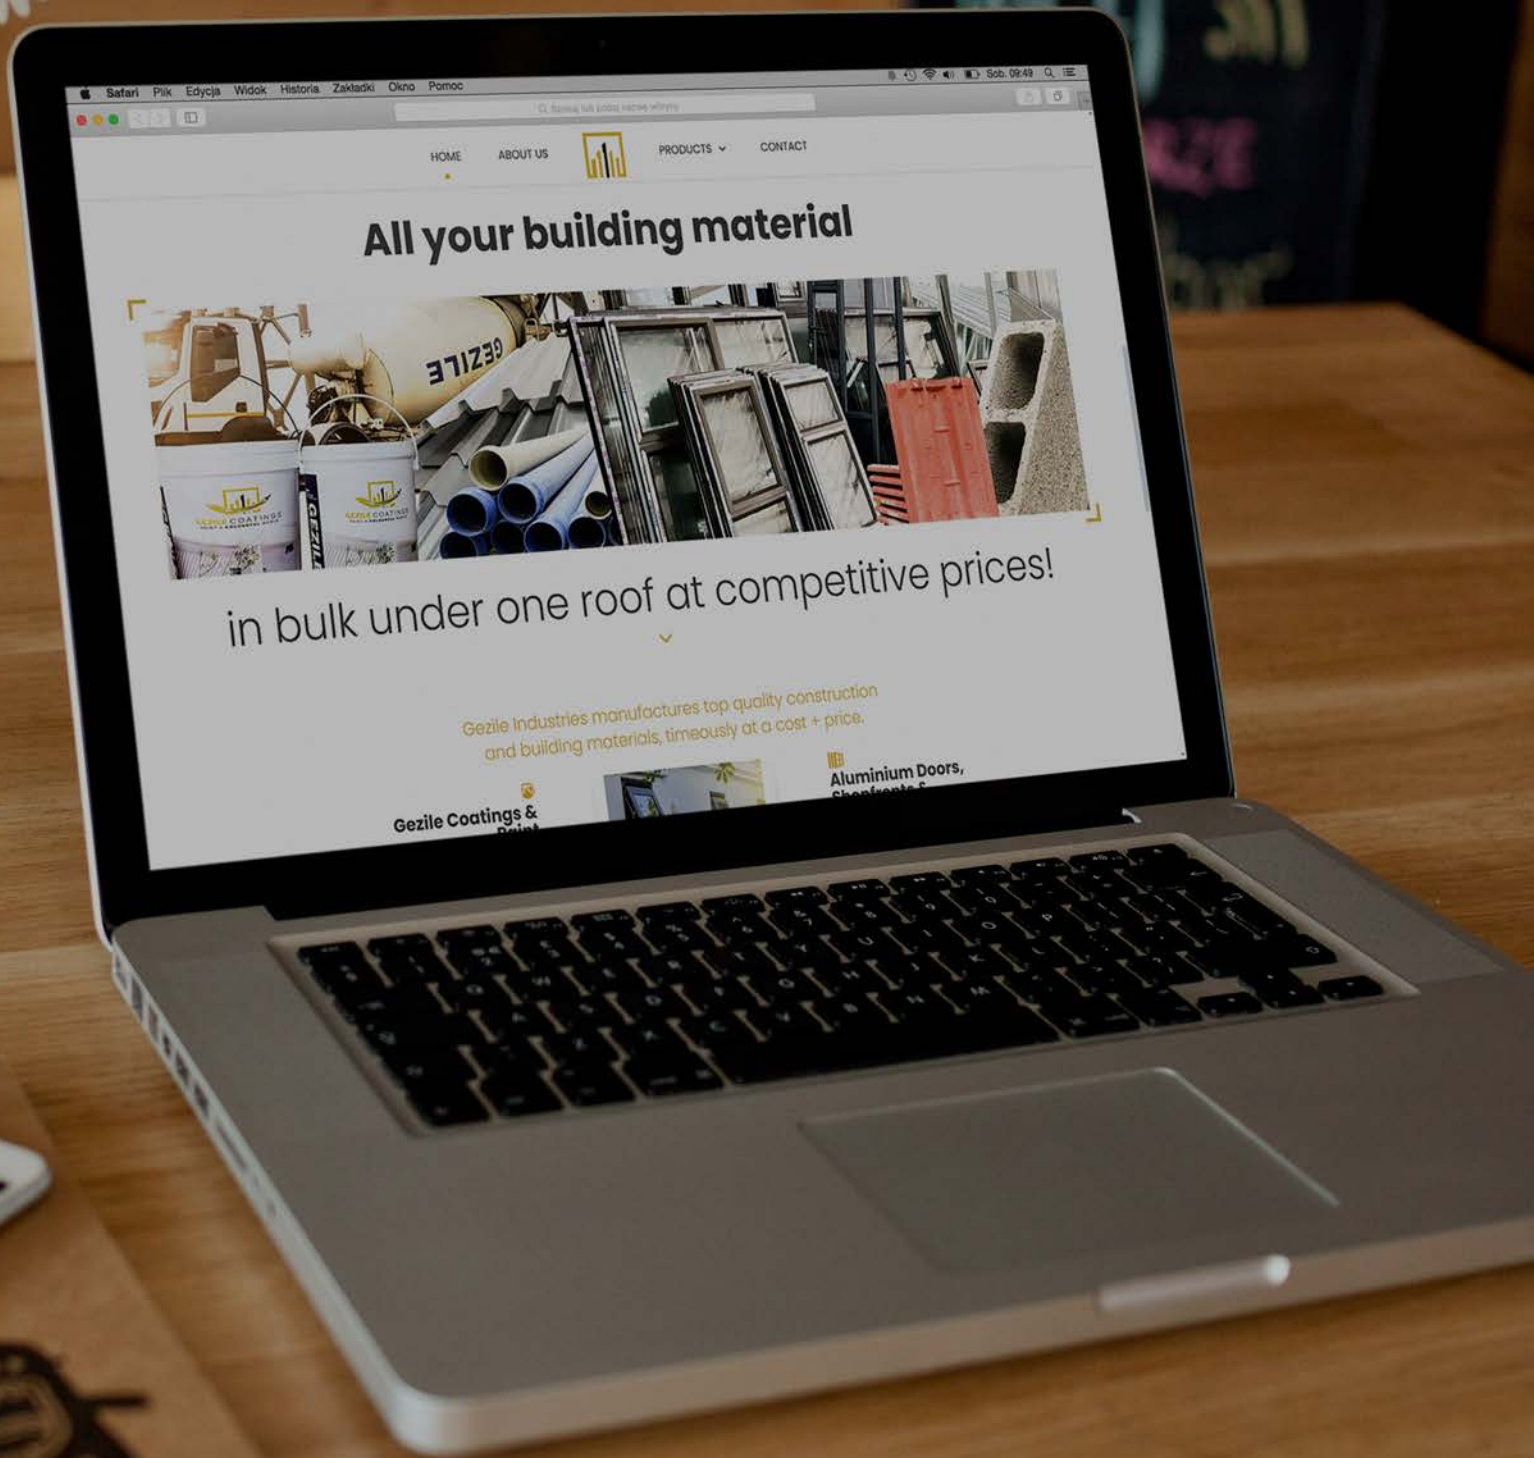

They are required to wear this during production.

Protective equipment includes:

- Overalls with reflective strips in the back and the front.
- Safety shoes.
- Elbow gloves.
- Hearing protection devices.
- Hard hats.
- Eye protection.
- Dust masks (where necessary).
